

A new Legislation to save the Mauritanian Environment

The survival of Mauritania depends on responsible management of its environment by the population

A new quality of Regulations

Coherence – Loi Cadre

Brevity

Clarity

Accessibility

Regulations as tool

- available on the internet in the village
- on GIS-referenced mapping support
- Specific to each biotop / ethnic area

**Quotation from proposal of Rainfed Project (Cr. 2965-MAU,
June 24, 1997**

- (ii) the project concept provides for the elaboration of land-use agreements among the beneficiaries, to be endorsed by Government and developed into a recognized land-tenure system. This approach is best suited to guarantee adherence on the ground level, but it is not certain whether centralist tendencies in Government might honor their commitments if different land-use models are being proposed for different regions in the country
